

Greetings to the list! My apologies for a bit of delay over the past two weeks. The end of summer has certainly been a busy time around here, with visits, travel, and getting the kids (and the parents) ready for going back to school.

I have some updates and document releases planned for this week, which include the following:

- 1) Transverter research document to be released with Grayg's updates
- 2) San Diego surface-mount capabilities described so we can move forward on any boards that may be available from uWSDR
- 3) H.264 Advanced Video Codec licensing update from MPEG LA
- 4) Feed order put together for Kent Britain Vivaldis for experimentation

Welcome to the Microwave Engineering Project development email list! Thanks for joining. Please forward this email to anyone you think would be interested in the development of the project.

Send updates and work proposals to w5nyv@yahoo.com
