

MEP Weekly Report for 1 December – 7 December 2008

The beginning of the Air Interface document was published with more to follow.

Work continued on the 5th revision of the Station Discovery Document.

Discussions about MEP as an IP network, MEP as a layer 2 network, and MEP as built from WiFi components occurred. The diagram below is an attempt to summarize the main points.

We learned about the ARCHES project through Glenn Currie KD5MFW.

We discussed DTN and whether and how it might fit in to MEP.
